Foliage

13

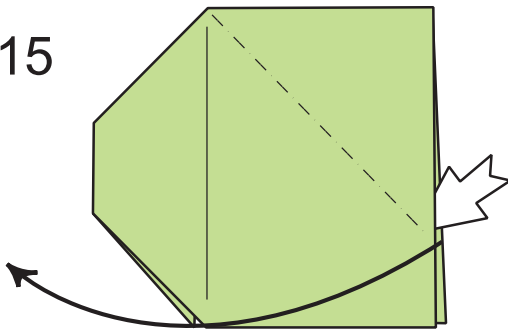

Turn over.

14

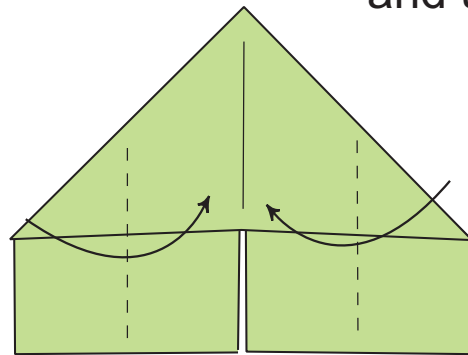

Crease well and unfold.

15

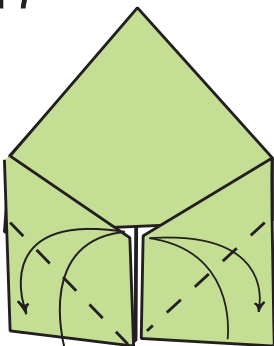

Place your finger inside to open. Squash the paper flat.

16

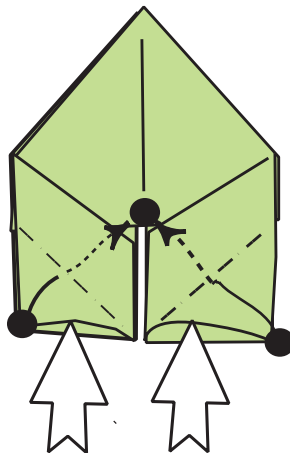

Fold to the center.

17

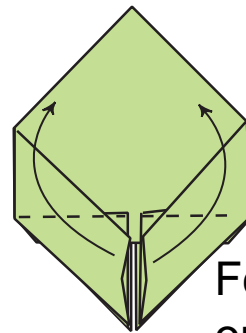

Crease well.

18

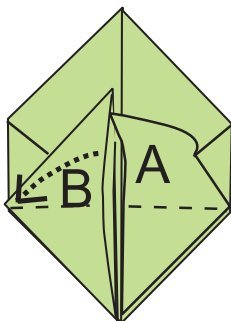

Repeat steps 9-11 on both flaps

19

Fold up the flaps on the top layer

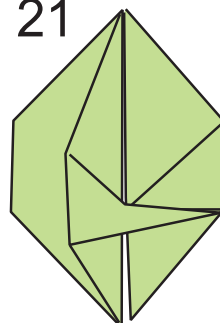

20

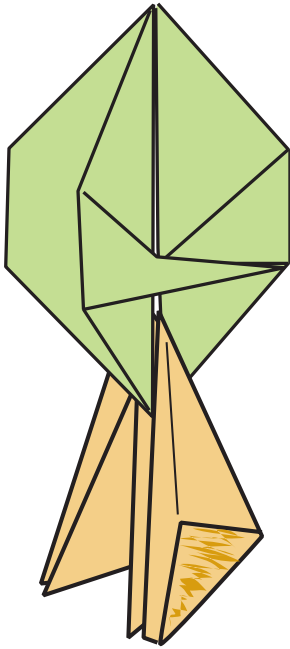

Tuck the triangular flap A into the pocket of flap B to form a shelf.

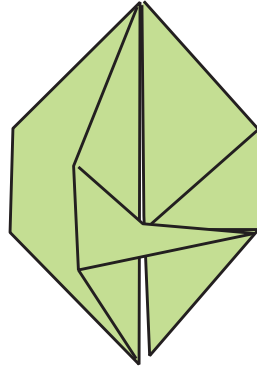

21

Repeat on the other side. The paper becomes 3-D.

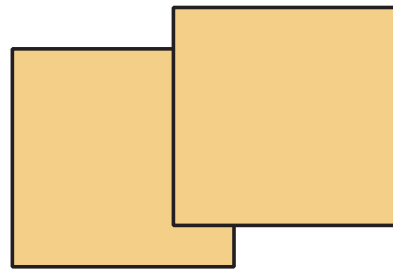

22

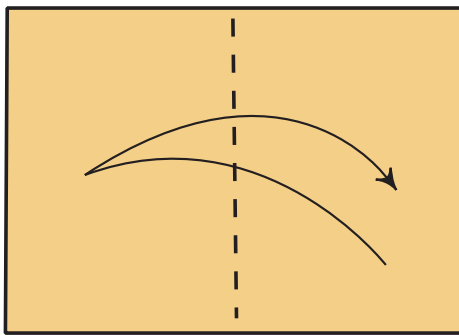

The foliage is finished.

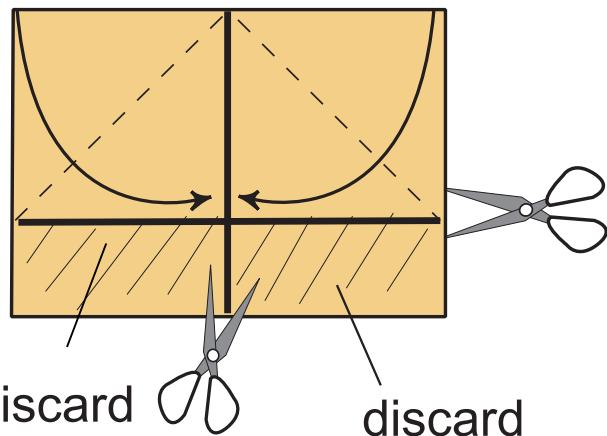

You need 2 sheets of square paper for the trunk.

Prepare the paper for the trunk.

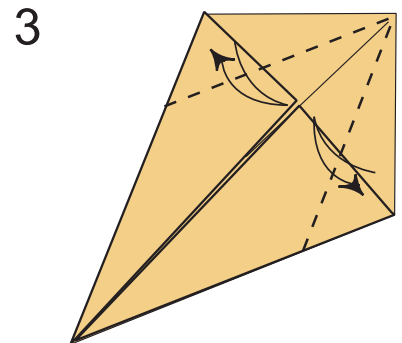

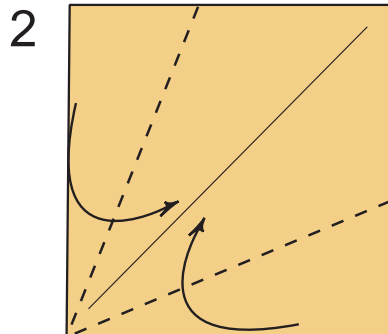

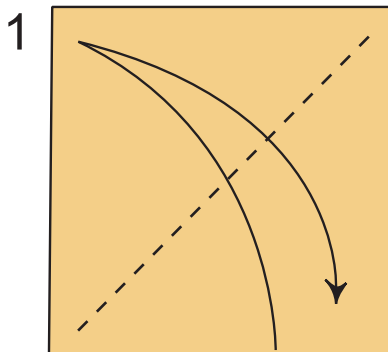

A4 paper

discard

discard

Fold both sheets the same way.

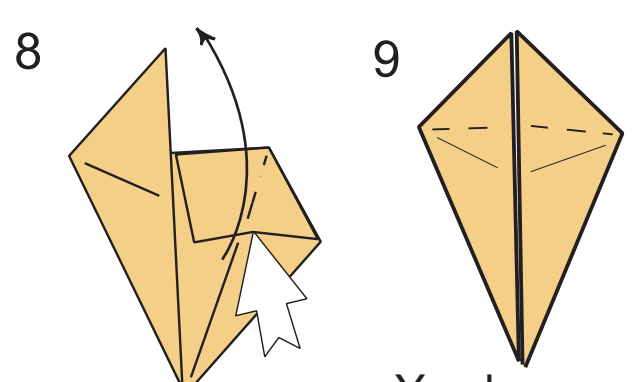

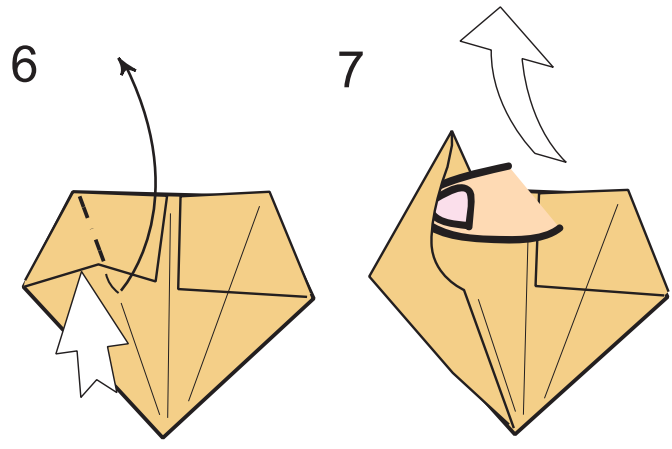

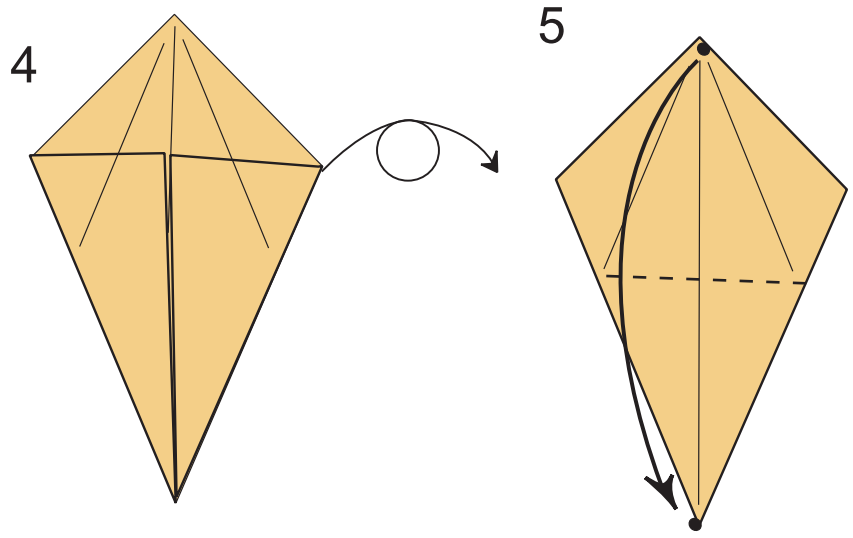

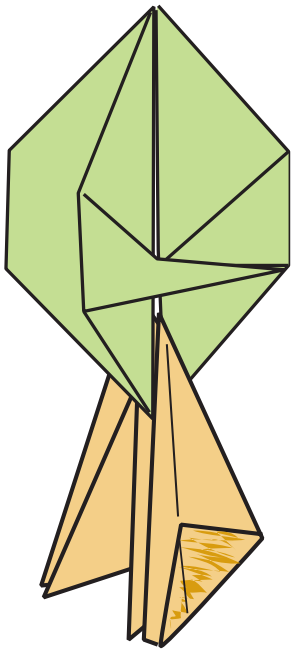

Crease well and unfold.

Trunk

You have made a fish base.

Fold and unfold the triangular flaps. Then tuck flap A into flap B

Point 'a' should meet point 'b'. The model will become 3-D.

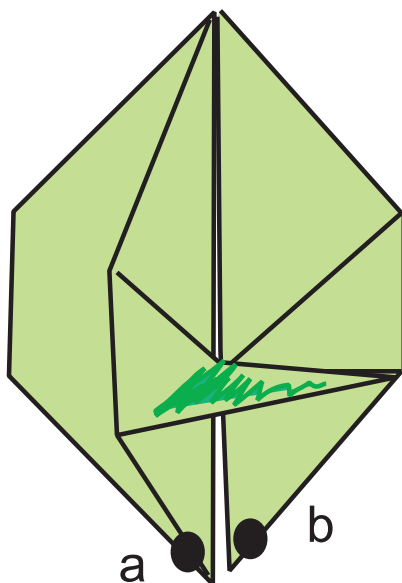

Make another trunk unit.

Tree

Let's put the tree together.

Insert 'a' between flaps 'c' and 'd'.
Insert 'b' between flaps 'e' and 'f'.

Here is the tree.

It stands strong like a man.

It gives a home to birds and shelter
to possums and koalas.

Children love to climb trees.

Sometimes they build a tree house
to play in.
